

This is an overview of areas to work on for next week w/c 23rd March.

Aim to complete as many as possible as and when time allows.

The main aim is to have fun whilst learning!

As writers we can...

'Have a go' at writing (where children make marks to match the spoken word). Or children who are more confident at writing will have a go at some plausible attempts to match letters to sounds.

Write notes, cards, letters, diaries, shopping lists and stories.

Make booklets with words and pictures on a range of topics – perhaps seed planting.

As mathematicians we can...

Count items in a group, count forwards and backwards in 1s and 2s. Spot shapes around the house. Create patterns with collage items.

Enjoy counting songs. <https://www.youtube.com/watch?v=7D4K9oi7oBM>

Work out number bonds to 5 then 10. These are two numbers which go together to make 5 or 10. So, 2 and 3 make 5. Etc. Then adding 2 single-digit numbers together using pictures of objects to 'visualise' such as dots, cakes – any small jotting.

We follow **White Rose** maths – we are working on the Spring area of learning on their resources

As readers we can...

Listen to stories being read at home or online. <http://stories.audible.com/discovery> Anticipate events and outcomes. Answer questions about the story/non-fiction text. YouTube have lots of online stories for children too.

Read the reading books which came home. There are usually some questions at the back of the book which when answered show if there is understanding of what was read.

In phonics we can...

Use the RWI books that came home to practise Speed Sounds. Read the Ditties in the book. Look for things around the house and outside that start with a certain phoneme. Play I Spy . For guidance on Read Write Inc follow the link below. Please revise Set 1 and 2 sounds.

In understanding the World we can...

Grow and care for seeds. Describe the seeds before you plant them.

Look closely at daily changes using a magnifier if you have one.

Talk about the changes when they happen. Measure the height in CM. Make a diary of the changes. Take photos. Write plant labels.

In keeping healthy we can...
