

		Year 1/2	Year 3/4	Year 5/6
	Asking Questions	Pupils should be taught to:  ask simple questions and recognise that they can be answered in different ways	Pupils should be taught to:  ask relevant questions and use different types of scientific enquiries to answer them  set up simple practical enquiries, comparative and fair tests	Pupils should be taught to:     plan different types of scientific enquiries to answer questions, including recognising and controlling variables where necessary
Scientifically	Measuring and Recording	Pupils should be taught to:  observe closely, using simple equipment  perform simple tests  gather and record data to help in answering questions	Pupils should be taught to:  make systematic and careful observations and, where appropriate, take accurate measurements using standard units, using a range of equipment, including thermometers and data loggers  record findings using simple scientific language, drawings, labelled diagrams, keys, bar charts, and tables  gather, record, classify and present data in a variety of ways to help in answering questions	Pupils should be taught to:  take measurements, using a range of scientific equipment, with increasing accuracy and precision, taking repeat readings when appropriate record data and results of increasing complexity using scientific diagrams and labels, classification keys, tables, scatter graphs, bar and line graphs
Working 8	Concluding	Pupils should be taught to:  Identify and classify  use their observations and ideas to suggest answers to questions	Pupils should be taught to:  identify differences, similarities or changes related to simple scientific ideas and processes  report on findings from enquiries, including oral and written explanations, displays or presentations of results and conclusions  use straightforward scientific evidence to answer questions or to support their findings	Pupils should be taught to:  identify scientific evidence that has been used to support or refute ideas or arguments  report and present findings from enquiries, including conclusions, causal relationships and explanations of and degree of trust in results, in oral and written forms such as displays and other presentations
	Evaluating		use results to draw simple conclusions, make predictions for new values, suggest improvements and raise further questions	Pupils should be taught to:  use test results to make predictions to set up further comparative and fair tests

	Year 1	Year 2	Year 3
	Pupils should be taught to:  identify and name a variety of common wild	Pupils should be taught to:  observe and describe how seeds and bulbs	Pupils should be taught to:  • identify and describe the functions of different
	and garden plants, including deciduous and evergreen trees	grow into mature plants     find out and describe how plants need water,	parts of flowering plants: roots, stem/trunk, leaves and flowers
Plants	<ul> <li>identify and describe the basic structure of a variety of common flowering plants, including trees</li> </ul>	light and a suitable temperature to grow and stay healthy	<ul> <li>explore the requirements of plants for life and growth (air, light, water, nutrients from soil, and room to grow) and how they vary from plant to plant</li> </ul>
			investigate the way in which water is transported within plants
			explore the part that flowers play in the life cycle of flowering plants, including pollination, seed formation and seed dispersal
	Pupils should be taught to:	Pupils should be taught to:	Pupils should be taught to:
umans	identify and name a variety of common animals including fish, amphibians, reptiles, birds and mammals	<ul> <li>notice that animals, including humans, have offspring which grow into adults</li> <li>find out about and describe the basic needs</li> </ul>	identify that animals, including humans, need the right types and amount of nutrition, and that they cannot make their own food; they get nutrition from what they eat
uding H	<ul> <li>identify and name a variety of common animals that are carnivores, herbivores and omnivores</li> </ul>	of animals, including humans, for survival (water, food and air)  describe the importance for humans of	identify that humans and some other animals have skeletons and muscles for support, protection and movement
Animals, Including Humans	<ul> <li>describe and compare the structure of a variety of common animals (fish, amphibians, reptiles, birds and mammals, including pets)</li> </ul>	exercise, eating the right amounts of different types of food, and hygiene	F. 5. 5. 5. 5. 5. 5. 5. 5. 5. 5. 5. 5. 5.
Anim	<ul> <li>identify, name, draw and label the basic parts of the human body and say which part of the body is associated with each sense</li> </ul>		

	Year 1	Year 2	Year 3
		Pupils should be taught to:	
		<ul> <li>explore and compare the difference between things that are living, dead, and things that have never been alive</li> </ul>	
g		<ul> <li>identify that most living things live in habitats to which they are suited and describe how different habitats provide the basic needs of different kinds of animals and plants, and how they depend on each other</li> </ul>	
r Habitat		<ul> <li>identify and name a variety of plants and animals in their habitats, including micro-habitats</li> </ul>	
Living Things and their Habitats		describe how animals obtain their food from plants and other animals, using the idea of a simple food chain, and identify and name different sources of food	
Living			

	Year 1	Year 2	Year 3
			Pupils should be taught to:
			recognise that they need light in order to see things and that the dark is the absence of light
			notice that light is reflected from surfaces
Light			recognise that light from the sun can be dangerous and that there are ways to protect their eyes
			recognise that shadows are formed when the light from a light source is blocked by a solid object
			find patterns in the way that the size of shadows changes
			Pupils should be taught to:
			compare how things move on different surfaces
ets			notice that some forces need contact between two objects, but magnetic forces can act at a distance
Magn			observe how magnets attract or repel each other and attract some materials and not others
Forces and Magnets			compare and group together a variety of everyday materials on the basis on whether they are attracted to a magnet, and identify some magnetic materials
			describe magnets as having two poles
			predict whether two magnets will attract or repel each other, depending on which poles are facing

	Year 1	Year 2	Year 3
Seasonal Change	Pupils should be taught to:  observe changes across the four seasons  observe and describe weather associated with the seasons and how day length varies		
Materials	<ul> <li>Everyday Materials</li> <li>Pupils should be taught to:</li> <li>distinguish between an object and the material from which it is made</li> <li>identify and name a variety of everyday materials, including wood, plastic, glass, metal, water, and rock</li> <li>describe the simple physical properties of a variety of everyday materials</li> <li>compare and group together a variety of everyday materials on the basis of their simple physical properties</li> </ul>	Uses of Everyday Materials  Pupils should be taught to:  identify and compare the suitability of a variety of everyday materials, including wood, metal, plastic, glass, brick, rock, paper and cardboard for particular uses  find out how the shapes of solid objects made from some materials can be changed by squashing, bending, twisting and stretching	Pupils should be taught to:  compare and group together different kinds of rocks on the basis of their appearance and simple physical properties  describe in simple terms how fossils are formed when things that have lived are trapped within rock  recognise that soils are made from rocks and organic matter

	Year 4	Year 5	Year 6
r Habitats	Pupils should be taught to:  recognise that living things can be grouped in a variety of ways  explore and use classification keys to help	Pupils should be taught to:  describe the differences in the life cycles of a mammal, an amphibian, an insect and a bird describe the life process of reproduction in	Pupils should be taught to:  describe how living things are classified into broad groups according to common observable characteristics and based on similarities and differences including.
Living Things and their Habitats	group, identify and name a variety of living things in their local and wider environment  recognise that environments can change and that this can sometimes pose dangers to living things	some plants and animals	similarities and differences, including micro-organisms, plants and animals  • give reasons for classifying plants and animals based on specific characteristics
Animals, Including Humans	<ul> <li>Pupils should be taught to:         <ul> <li>describe the simple functions of the basic parts of the digestive system in humans</li> </ul> </li> <li>identify the different types of teeth in humans and their simple functions</li> <li>construct and interpret a variety of food chains, identifying producers, predators and prey</li> </ul>	describe the changes as humans develop to old age	Pupils should be taught to:  identify and name the main parts of the human circulatory system, and describe the functions of the heart, blood vessels and blood  recognise the impact of diet, exercise, drugs and lifestyle on the way their bodies function  describe the ways in which nutrients and water are transported within animals, including humans

	Year 4	Year 5	Year 6
			Pupils should be taught to:
ritance			<ul> <li>recognise that living things have changed over time and that fossils provide information about living things that inhabited the Earth millions of years ago</li> </ul>
and Inhe			<ul> <li>recognise that living things produce offspring of the same kind, but normally offspring vary and are not identical to their parents</li> </ul>
Evolution and Inheritance			identify how animals and plants are adapted to suit their environment in different ways and that adaptation may lead to evolution
	Pupils should be taught to:		
	<ul> <li>compare and group materials together, according to whether they are solids, liquids or gases</li> </ul>		
States of Matter	observe that some materials change state when they are heated or cooled, and measure or research the temperature at which this happens in degrees Celsius (°C)		
State	identify the part played by evaporation and condensation in the water cycle and associate the rate of evaporation with temperature		

	Year 4	Year 5	Year 6
		Pupils should be taught to:	
		describe the movement of the Earth, and other planets, relative to the Sun	
pace		describe the movement of the Moon relative to the Earth	
Earth and Space		describe the Sun, Earth and Moon as approximately spherical bodies	
Earth		use the idea of the Earth's rotation to explain day and night and the apparent movement of the sun across the sky	
		Pupils should be taught to:	
		<ul> <li>explain that unsupported objects fall towards the Earth because of the force of gravity act- ing between the Earth and the falling object</li> </ul>	
ses		identify the effects of air resistance, water resistance and friction, that act between mov- ing surfaces	
Forces		recognise that some mechanisms, including levers, pulleys and gears, allow a smaller force to have a greater effect	

	Year 4	Year 5	Year 6
			Pupils should be taught to:
			<ul> <li>recognise that light appears to travel in straight lines</li> </ul>
Light			use the idea that light travels in straight lines to explain that objects are seen because they give out or reflect light into the eye
Li			explain that we see things because light travels from light sources to our eyes or from light sources to objects and then to our eyes
			use the idea that light travels in straight lines to explain why shadows have the same shape as the objects that cast them
	Pupils should be taught to:		
	identify how sounds are made, associating some of them with something vibrating		
	recognise that vibrations from sounds travel through a medium to the ear		
Sound	<ul> <li>find patterns between the pitch of a sound and features of the object that produced it</li> </ul>		
o,	<ul> <li>find patterns between the volume of a sound and the strength of the vibrations that produced it</li> </ul>		
	recognise that sounds get fainter as the distance from the sound source increases		

	Year 4	Year 5	Year 6
P	upils should be taught to:		Pupils should be taught to:
	identify common appliances that run on electricity		associate the brightness of a lamp or the volume of a buzzer with the number and voltage of cells used in the circuit
•	construct a simple series electrical circuit, identifying and naming its basic parts, including cells, wires, bulbs, switches and buzzers		compare and give reasons for variations in how components function, including the brightness of bulbs, the loudness of buzzers and the on/off position of switches
·	identify whether or not a lamp will light in a simple series circuit, based on whether or not the lamp is part of a complete loop with a battery		use recognised symbols when representing a simple circuit in a diagram
Electricity	recognise that a switch opens and closes a circuit and associate this with whether or not a lamp lights in a simple series circuit		
	recognise some common conductors and insulators, and associate metals with being good conductors		

Pupils should be taught to:  compare and group together everyday materials on the basis of their properties, including their hardness, solubility, transparency, conductivity (electrical and thermal), and response to magnets  know that some materials will dissolve in liquid to form a solution, and describe how to recover a substance from a solution  use knowledge of solids, liquids and gases to decide how mixtures might be separated, including through filtering, sieving and evaporating  give reasons, based on evidence from comparative and fair tests, for the particular uses of everyday materials, including metals, wood and plastic  demonstrate that dissolving, mixing and changes of state are reversible changes  explain that some changes result in the formation of new materials, and that this kind
<ul> <li>changes of state are reversible changes</li> <li>explain that some changes result in the formation of new materials, and that this kind of change is not usually reversible, including changes associated with burning and the</li> </ul>
